# Sheeba Christy S

Senior Automation QA Lead | GenAI for Quality Engineering | SAP

Chennai, India • +91 9677174321 • sheebasam777@gmail.com • linkedin.com/in/sheeba-samuel-577054136 • github.com/Sheeba272

## PROFESSIONAL SUMMARY

Senior Quality Engineering leader with 10+ years of experience across SAP, Banking, Insurance, and Telecom, specializing in automation strategy, release quality governance, and AI-driven testing transformation. Proven track record in leading SAP regression automation for 5,000+ test cases, reducing test-cycle setup effort by 90%, and mentoring QA teams while partnering with stakeholders across the software delivery lifecycle. Built six GenAI agents for requirement validation, test case generation, defect intelligence, execution reporting, and accessibility testing using Python, RAG architecture, ChromaDB, Ollama, and REST API integrations.

## CORE COMPETENCIES

- GenAI Agent Development for Quality Engineering
- RAG Architecture and LLM-Powered Assistant Solutions
- Automation Strategy, Framework Design and Roadmap Ownership
- Enterprise UFT Framework and SAP Regression Automation
- Zephyr Scale–JIRA REST API Integration and Test Orchestration
- Defect Intelligence, Test Case Generation and Requirement Validation
- Accessibility Testing, WCAG 2.1 and AI-Guided Remediation
- Release Quality Governance, Stakeholder Communication and Team Mentoring

## PROFESSIONAL EXPERIENCE

**Senior IT Analyst | Tata Consultancy Services (TCS), Chennai | 2022 – Present**

• AI for QE — GenAI Agent Suite | Lead Developer

• Led design and deployment of six GenAI agents covering requirements, test design, execution, defect intelligence, and accessibility across the QE lifecycle.

• Presented AI innovations to five executive client leadership forums and drove adoption of intelligent quality engineering practices.

• Built enterprise-ready AI solutions in a constrained client AVD environment using Python, Flask, ChromaDB, sentence-transformers, and Ollama.

• Integrated solutions with JIRA REST and Zephyr Scale Cloud APIs to support execution orchestration and intelligent QA workflows.

• Developed the Smart Defect Intelligence Assistant, AI Test Case Smart Assistant, Test Case Generation Agent, Requirement Validation Agent, AI Execution Report Analyzer, and AccessAI.

• Owned SAP regression automation for a suite of more than 5,000 test cases, improving coverage and reducing manual execution effort.

• Built Python utilities to automate Zephyr test-cycle creation and bulk testcase mapping, reducing setup effort by approximately 90%.

• Defined the SAP regression automation roadmap, maintained the UFT framework, and integrated Zephyr Scale with JIRA for end-to-end orchestration.

• Drove release-level test planning, execution monitoring, and defect governance across four major releases and seven to eight minor releases annually.

• Mentored a team of five QA engineers and embedded automation best practices across the delivery function.

**Senior Test Engineering Analyst | Accenture | 2019 – 2022**

• Maintained and executed UFT automation for retail banking applications and prepared test plans and requirements analysis.

• Designed reusable test cases that adapted to changing requirements while maintaining coverage.

• Reviewed application requirements and test scenarios to support planning and execution.

• Investigated test failures and documented defects for analysis and resolution.

• Maintained reusable automation assets to improve maintainability throughout application changes.

**Testing Executive | Infosys, Chennai | 2016 – 2019**

• Automated test cases across banking, insurance, and communication domain applications.

• Built reusable functions and managed defect tracking.

• Implemented automated testing strategies to reduce manual effort, minimize human error, and support production quality.

• Developed and maintained reusable automation functions to support repeatable execution across enterprise applications.

• Tracked defects and communicated testing observations to support investigation and product stabilization.

## KEY ACHIEVEMENTS & RECOGNITION

- Built six GenAI agents for Quality Engineering from design through client-environment deployment, enabling AI-assisted QA across the lifecycle.
- Earned the Claude Certified Developer – Foundations (CCDV-F) certification from Anthropic.
- Reduced Zephyr test-cycle creation effort by approximately 90% using custom Python and REST API utilities.
- Owned SAP regression automation strategy for a 5,000+ test case suite.
- Led quality governance across four major releases and seven to eight minor releases annually.
- Presented AI innovations to five executive client leadership forums.
- Recognized as Star Performer FY24 — TCS.
- Unit Finalist — TATA INNOVISTA (TCS innovation programme).
- Co-presented the internal TCS event “Unstoppable: Stories that Move” on the ALM-to-Jira Zephyr migration journey.

## EDUCATION & CERTIFICATIONS

• B.Sc. Mathematics | Madras Christian College, Chennai | 2016

• Claude Certified Developer – Foundations (CCDV-F), Anthropic

• Generative AI – QA & GenAI (Competency, E1 Proficient)

• WITA – AI / GenAI Architect (Certification)

• GenAI & Prompt Engineering for QA & Automation

• Microsoft Azure Solutions (Digital: WINGS 2)

• Enterprise Architect – SAP (Financials / SCM / HCM)

• Business Analysis in Retail (Competency, E2 Proficient)

• Planned for 2026: Microsoft Azure AI Fundamentals (AI-900)
